## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. **Claims 1-14** are allowed.

The following is an Examiner's statement of reason for allowance: Claims 1-14 are allowed, because the prior art does not disclose all the specific elements recited in claim 1. In particular, elements involving "if said file of additional data is present in said memory, starting up of a second application, said second application using said file of additional data, where each of said applications is a functional assembly designed for execution at the level of the one of said receivers" are not obvious in the prior art taken with all the other limitations. While the overall method has analogous prior art, including Park et al., Rodriguez et al. and Junqua et al. the details of the method render claims 1 allowable. Claims 2-14 are allowed because they depend directly or indirectly from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Citation of Pertinent Prior Art***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2425

Zigmond et al. (U.S. Patent No. 6,571,392) discloses a receiver unit receives the URI from the broadcast channel. If the information resource identified by the URI is available locally (for example, is present in local storage on the receiver unit), then the receiver unit uses the URI to retrieve the information resource locally. If on the other hand, the information resource is not available locally, then the receiver uses the URI to retrieve the information resource from the internet (see abstract).
